Mono Solutions (long description)

Mono Solutions, headquartered in Copenhagen, Denmark, provides a Software-as-a-Service (SaaS)-based platform for the design, delivery and management of professional, responsive websites and e-commerce. We help our resellers to efficiently and cost-effectively deliver high quality online presence solutions to small- and medium-sized businesses (SMBs) through our platform, along with our partner network of distinguished digital service providers of search engine marketing (SEM), search engine optimization (SEO), fulfillment, domains and emails, online booking, call tracking and other complementary services.

The Mono platform is optimized for both Do-It-Yourself (DIY) clients, as well as for resellers in the SMB space offering Do-It-For-Me (DIFM) solutions, with tools and workflows designed to address the common and costly challenges faced by resellers when selling and delivering high volumes of websites.

Like our resellers, we care deeply about small and medium businesses, and believe that they can and should enjoy the same level of design and performance from their web presence solutions as larger companies. We are proud of our long lasting partnerships with directories, Telcos, hosting and local media companies in the U.S. and Europe.
